

For best conditions
throughout the year.

The Vanco™ FourSeason 2.

- ▶ Maximum economy in all seasons.
- ▶ High safety in summer, thanks to excellent handling on dry roads.
- ▶ Outstanding safety through the winter, thanks to reliable traction and braking performance.

Issue 9/2010
235/65 R 16 C
“Good”

The bottom line = 12 months of safety.

Technical highlights.

Maximum economy in all seasons.

Thanks to the wear-optimised all-weather rubber compound of the Vanco™ FourSeason 2, together with its reinforced design and scuff rib, this tyre offers maximum wear resistance and a long service life. As a result, it provides outstanding economy throughout the year.

High safety in summer, thanks to excellent handling on dry roads.

The use of computer-optimised pitch geometry means the stiffened pattern blocks combine the advantages of both block and band designs, providing enhanced tread stability for perfect handling on dry roads.

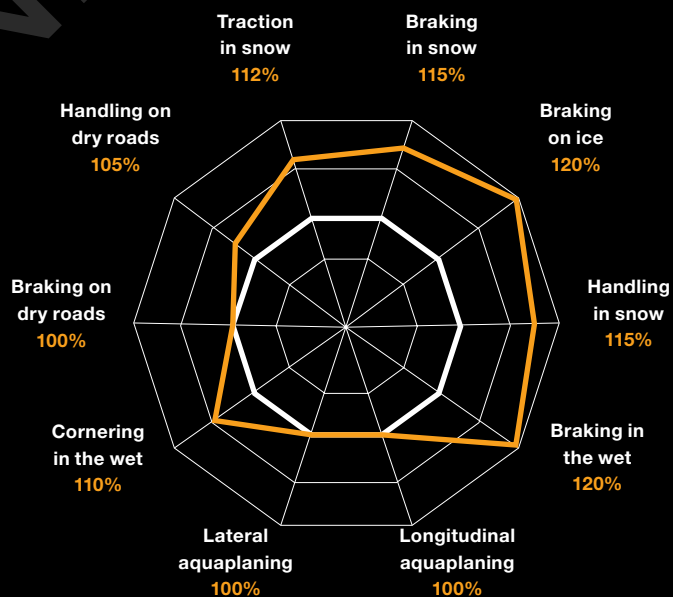

Outstanding safety through the winter, thanks to reliable traction and braking performance.

The tread pattern on the Vanco™ FourSeason 2 features a large number of sipes for maximum grip on roads in winter. Moreover, the wide longitudinal and lateral grooves mean optimum dispersion of water and slush. The tyre thus provides best possible safety in winter, giving reliable traction and braking performance.
