Experience the next EV-olution

An EV-dedicated tyre specifically designed to get the best out of your electric vehicle

An EV-dedicated tyre specifically designed to get the best out of your electric vehicle

The eContact offers an EV-dedicated tyre incorporating cutting-edge German technologies to deliver an impressive range of benefits that set it apart. Formulated to handle the increased weight and instantaneous torque delivery possessed by electric vehicles, the eContact is equipped with leading innovations including ContiSeal and ContiSilent.

At the same time, enhanced on-road safety guarantees wet handling and braking performance, without compromising on a smooth, comfortable and optimised drive.

Features & Benefits

- ContiSeal technology provides reliability and peace of mind even without a spare tyre
- ContiSilent technology ensures a whisper-quiet ride, thanks to a polyurethane foam acting as a noise absorber
- Excellent wet handling & braking performance to handle increased weight and instantaneous torque delivery
- Advanced noise reduction technology to ensure a comfortable journey
- Low rolling resistance tyre for longer driving range

POWR Up the Possibilities

- **Puncture protection** - Extended mobility without a spare tyre
- **On-road safety** - excellent wet handling and braking performance
- **Whisper quiet** - noise reduction technology
- **Range per charge** - low rolling resistance
