

Frigo HP2

Frigo HP2 is a successor of Debica Frigo HP – winter tire designed for high performance cars. Equipped with a range of advanced technology solutions Debica Frigo HP is designed for drivers who appreciate dynamic driving. In addition, the tire is characterized by extended mileage and affordable price.

- Innovative tread design with grooves and sipes oriented in such a way that they provide useable biting edges during every maneuver while driving on snow covered roads.
- Self-locking sipes bite into the snow improving control of the vehicle and providing excellent behavior and traction on snow.
- Optimized tire construction and towering rubber blocks provide extended mileage, saving your money.
