

DV2+

The Delinte DV2+ offers excellent performance and durability for vans in all driving conditions. This tyre is designed to handle heavy loads even more efficiently, with an optimised tread that ensures maximum grip and stability. Thanks to improved water drainage, the DV2+ continues to perform exceptionally on wet roads, while reinforced shoulders and wider tread ribs ensure even better cornering control. Whether for long trips or intensive daily use, the Delinte DV2+ delivers top quality, long life and enhanced driving comfort.

PROPERTIES

✓ Improved water drainage

Three wide longitudinal grooves provide faster water drainage, further increasing wet grip and control.

✓ Optimised tread pattern

New generation of width grooves reduce the risk of aquaplaning and improve handling.

✓ Maximum stability

Enlarged, extra-reinforced shoulder offers unrivalled stability, even when heavily loaded.

✓ Superior braking performance

Advanced tread and revised grooves provide extra grip and shorter braking distances, increasing safety.
