

Eagle F1 Asymmetric 2

The tyre with A-rated wet grip.

Split seconds don't just make the difference when accelerating. That is why we developed ActiveBraking, which combined with our new 3D Block Technology increases road contact.

Because more rubber on the road means more braking power, so you can enjoy driving in wet or dry conditions.

A-rated wet grip

Rated A for wet grip performance, the highest grade a tyre can achieve in wet grip.

Shorter braking distance on dry and wet roads

ActiveBraking Technology with 3D block design increases tyre contact with the road reducing braking distance in wet and dry conditions.

Improved steering precision and handling

The tread compound improves wet grip but also dry handling performance.

Also available in **RunOnFlat** TECHNOLOGY

Approved for OE fitment by leading vehicle manufacturers
