

EFFICIENTGRIP

A robust hybrid tyre.

Environmentally-friendly FuelSaving Technologies are at the heart of this High Performance tyre which has a proven, significantly high safety element because of its excellent braking performance levels on both dry and wet roads.

ROBUST CONSTRUCTION

Developed to handle the local African conditions. Improved capability in negotiating hazards.

FUEL-SAVING, ENVIRONMENTALLY FRIENDLY AND LONG LASTING

The advanced tread compound gives you more mileage between tyre changes, saving you money. The light weight structure with the tread compound results in lower fuel costs and CO₂ emissions on every journey.

BETTER BRAKING ON WET ROADS

With a unique tread surface and a blade arrangement that sheds water, the EfficientGrip offers better wet performance and shorter braking distances.
