Technology for Allseason Conditions

SUMMER

Accelerated water escape

Broad lateral groove

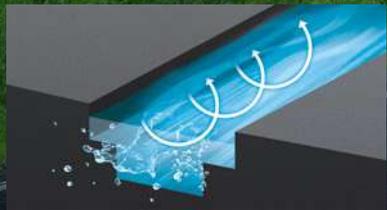

Reliable handling & Minimised abnormal wear

Enhanced block stiffness with high-density sipes

Drain effectively & retaining block stiffness

Two-step aqua slant

Improved wet & snow grip

High loading silica compound based on natural ingredients

WINTER

Improved braking in winter

3D winter sipes

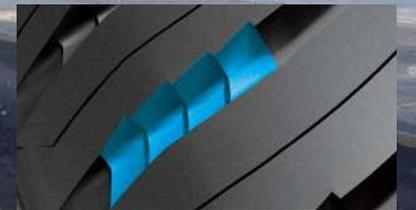

Maximised snow traction to the edge

Serrated biting-edge groove

Enhanced cornering in snow

The slush edge located on groove

Contribution to circularity and sustainability by using ISCC certified natural oil & bio polymer

ISCC PLUS is an international sustainability certification program for bio-based and circular (recycled) raw materials under the European Renewable Energy Directives (EU RED) that evaluates a company's sustainability from its raw materials, manufacturing process, and to finished products. Hankook is the world's first in tyre industry has obtained ISCC PLUS certification for its efforts to replace petrochemical oils with natural oils and biochemical products (synthetic rubber) with bio-based polymers.
