

Superior performance for premium SUVs

CRUGEN HP91

- High technology material for optimal wet grip
- Driving stability even at high speed
- Extraordinary handling and braking in wet conditions
- Low wear through high dispersible silica
- High cornering stability
- Outstanding resistance against aquaplaning

Technology

-
- High-Tech Materials & Compound**
 - The latest material compound system and multi-functional rubber offer both a comfortable drive and greater wear performance
 - Stylish Lateral Design**
 - The Stylish Curve Type Angle increases both rigidity and the size of the contact area to improve handling and stability on all surfaces
 - 3D Dimple Design**
 - "C-Cut 3D" maximizes both block rigidity and durability
 - Wide 4 Channels Main Grooves**
 - 4 wide circumferential grooves for efficient water displacement
 - Better stability at high speeds thanks to ESCOT, KUMHO TIRES independently developed design technology**
 - Increased tread and sidewall rigidity offer better handling and durability at high speeds

- A Convex TR**
 - Maximizes grip through even contact pressure
- B Increased Tread Rigidity**
 - Equipped with High Tensile Aramide
- C Increased Bead Rigidity**
 - High rigidity Bead Wrapping
 - High Modulus rubber used in sidewalls
- D Strengthened Rim Protector**
