

# Comfortable driving & maximum safety

## ECSTA HS51

- Newly developed premium tire
- Maximum comfort combined with the highest safety
- Improved braking performance
- Excellent traction on wet & dry roads
- High mileage and even wear
- Optimal handling
- Dynamic design

## Technology

- 
- Solid Rib-Type Design**
    - Improved wet braking and reinforced block stiffness by centralized ribbed-pattern design
  - Wide Lateral Grooves**
    - Wide lateral grooves help to maximize water displacement when cornering
  - Wide 4 Channels Main Grooves**
    - The pattern design with its 4 wide linear grooves improves water displacement performance
  - Closed & Notch Shoulder**
    - Handling performance has been improved thanks to a strengthened shoulder block
    - A groove notch has been added to improve performance while cornering and in the wet
  - Compound Technology**
    - High Technology Material & Compound is applied to maximize the Driving Performance

<b>Multi-Functionalized S-SBR</b>  Multi-Functionalized S-SBR is applied to maximize the Driving Performance & low fuel consumption	<b>High Grip Resin</b>  High Grip Resin is applied for Dry & Wet Grip improvement	<b>High Dispersible Micro Silica (HDMS)</b>  High Dispersible Micro silica is applied for Wear & ground surface area optimization
