

# PERFORMANCE TOURING LS388

EQUIPPED FOR:

The LS388 is a smart Performance, Touring tire designed for miles of comfort, long-wear, and fuel efficiency, with a 50K Mileage Warranty.

## FUEL-SAVING TREAD COMPOUND

Smart and efficient, your vehicle will use less fuel. We purposefully formulated the rubber compound of the LS388 to be fuel-efficient by reducing rolling resistance.

## WET-GRIP GROOVE DESIGN

The four wide long grooves and precisely placed lateral grooves work together to channel water and direct it out and away from the tire.

## SOLID CENTER RIB FOR STABILITY

The center rib of the LS388 is solid to increase stability in straight-line driving at higher speeds.

## LOW-WEAR SHOULDER

This tire shoulder is fully equipped with heat-resisting areas that keep the tread blocks stable, protecting them from irregular wear. This engineering also increases stability when cornering.

## QUIET-RIDE PITCH ALIGNMENT

We designed the tread pitch width and alignment at optimum angles to suppress road noise.

## M+S RATED

The M+S rating on the tire sidewall indicates engineering for better traction in the mud and snow.
