	Wet grip	B~C
	dB(Level)	71~72 (B)

- FEATURES**
- All-season tyre for all year round

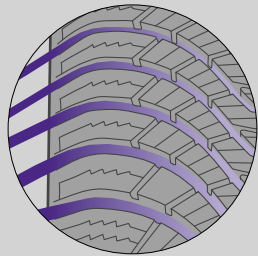

Hybrid Performance (Dry, Wet & Snow)

High Grip Silica Compound for any road condition

3PMSF(Snowflake mark), M+S

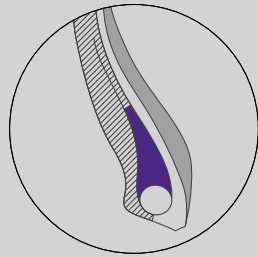

Handling

The G FIT 4S hybrid performance tyre guarantees optimum handling in all weather and any road conditions.

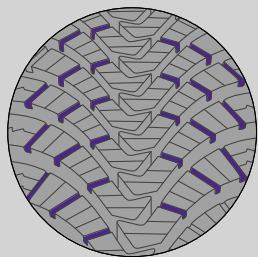

Wider Drainage Grooves

The uniquely streamlined aqua lateral grooves of the tyre expand from the centre outwards in the contact area. This enhances drainage in snowy and rainy conditions, by expelling precipitation on the road away from the tyre.

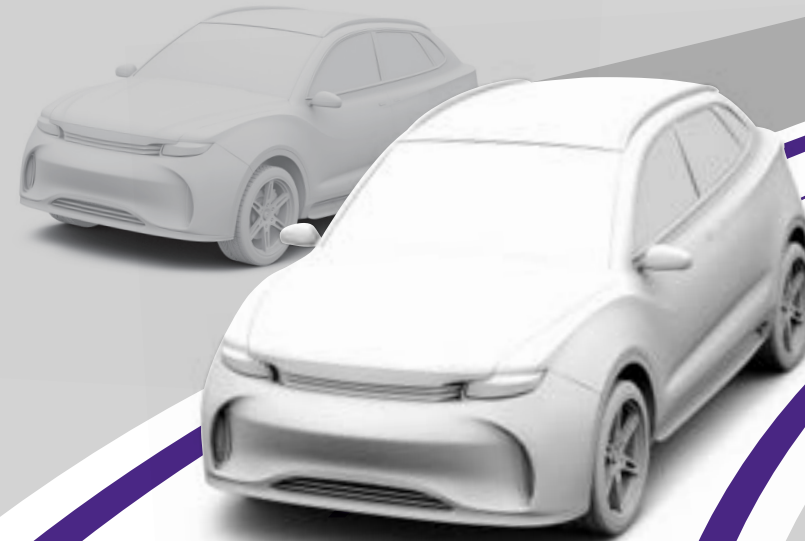

Optimised strong sidewall

Greater steering stability through the adoption of high-hardness bead filler with covered sidewall rubber. Strand bead wires improve uniformity and durability.

Angled Semi-Groove

Uniquely designed semi-grooves to enable impressive steering at all angles. This also provides stable grip by maximising the edge effect of the groove and the contact area on the road.

Wet

Braking

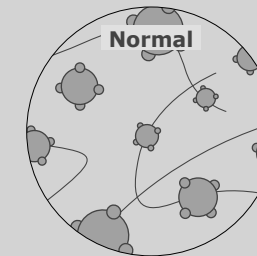

Braking

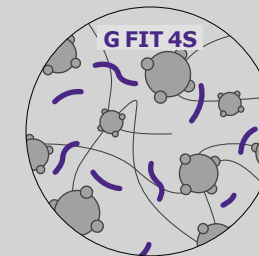

The G FIT 4S hybrid performance tyre guarantees optimum braking in all weathers and any road conditions.

High Grip Silica Compound

The silica compound provides improved performance on wet and snowy roads. The addition of this natural ingredient within the tyre's technology ensures high performing grip all year round.

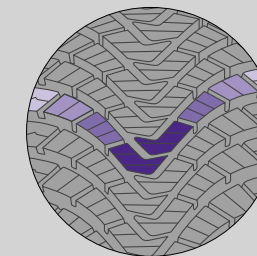

Normal

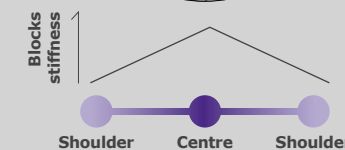

G FIT 4S

- Polymer
- Enhancing Additives
- Natural Oil

Interlocking Centre Block

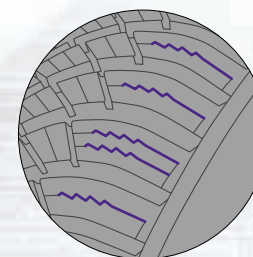

The blocks interlocked in the centre of the tyre secure the block stiffness and rigidity. This provides drivers with stability, comfort and control.

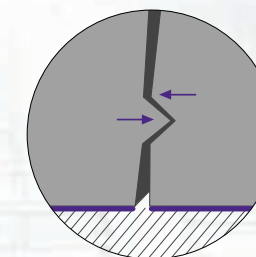

Winter performance

The G FIT 4S provides reliable and safe driving performance even in winter. This is proven by certification mark on winter regulations.

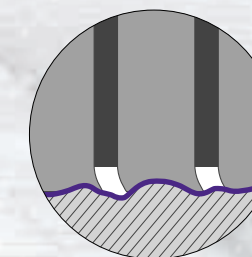

The Wave-type 2D sipe

The wave-type 2D sipes are applied to the shoulder area of the tyre to maximise the snow grip and deliver impressive cornering performance.

The linear shape 3D sipe

The high density application of the linear 3D sipes ensures safety and grip due to enhanced contact area.

Flexible rubber technology

Impressive grip all year round – the enhanced flexibility of the tyre, due to the silica compound used, ensures driver safety and comfort on any road conditions, even in winter.
