The Tyre Labelling Regulation introduces

- Fuel Efficiency / Wet Grip / External Rolling Noise of Tyres

Its aim is to

- Improve safety
- The environmental and economic efficiency of road transport by promoting fuel efficient and safe tyres
- Low noise levels

Actual fuel saving and road safety depend heavily on the behavior of drivers, and in particular the following :

- Eco-driving can significantly reduce fuel consumption,
- Tyre pressure should be regularly checked to optimise wet grip and fuel efficiency performance,
- Stopping distances should always be strictly respected.

Fuel efficiency
rolling resistance(R.R)

Wet grip
braking performance

Noise level
exterior noise
