# MPS400 Variant All Weather 2

## For transporters and vans

### Technical Highlights

#### High performance level on wet roads

The newly stepped pattern design improves interlocking with wet roads. Its lateral shoulder grooves provide efficient water displacement. Thus, the tyre offers very good aquaplaning resistance and short braking distances on wet roads.

#### Completely new performance level on snow

Step-shaped grooved edges providing snow-to-snow-friction and innovated snow pockets ensure the best possible winter safety, giving outstanding traction and braking performance.

#### Extra driving stability in any weather

The Ribbon structure of the pattern with the tie bar in the centre ensures excellent directional stability and safe cornering on dry, wet and snowy roads. This results in a high level of driving stability for all seasons.

### Sidewall Features

#### Scuff Ribs

Scuff rib with additional rubber layer on the sidewall provides protection in the scuff prone area and thus guarantees extended tyre life.
