Normal load

AGILIS 3 DELIVERS UNCOMPROMISED SAFETY PERFORMANCE

MICHELIN TIRES, DESIGNED TO DELIVER PERFORMANCES MADE TO LAST

Safety made to last

- Shorter wet braking distance when new (5%) and when worn (11%) compared with leading competitor¹

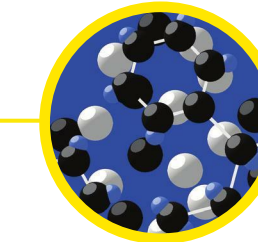

Your partner for longer

- Michelin's excellence in longevity proven by +25% more mileage vs. previous generation²
- Less downtime for you and your business

Every drop counts

- 12%³ superior rolling resistance resulting in reduced fuel consumption giving you the environmental advantage

Innovative compound

For improved wet grip, longer mileage and lower rolling resistance.

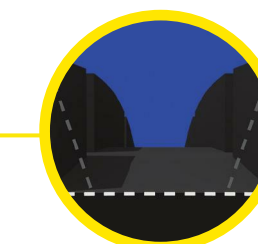

Stone ejectors

To prevent stone trapping and lessen downtime, resulting in low running cost.

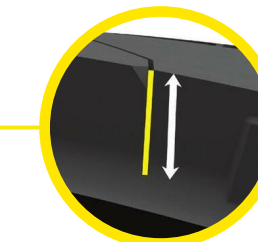

Sidewall shields

Abrasion-resistant rubber compounds that give extra sidewall protection.

U-shape grooves

A more 'vertical' sidewall increases void ratio to 2mm remaining tread depth which allows higher water clearance for lasting wet grip performance.

Full depth sipes

Ensuring good flexibility of the tread blocks, for better wet grip performance when both new and worn.

TYPICAL VEHICLE FITMENTS

- Ford Transit
- Hyundai Starex / H1
- Isuzu D-Max
- Mercedes Sprinter
- Nissan Urvan
- Toyota Commuter, Hiace, Hilux
