

MICHELIN / PILOT ALPIN⁵ SUV

SAFETY AND MOBILITY IN SEVERE WINTER FOR YOUR SUV

ROAD CONTROL MADE TO LAST IN SEVERE WINTER CONDITIONS

Control and driving precision on wet roads and snow^{1, 2, 3}

Excellent snow traction for effortless mobility in winter^{1, 2}

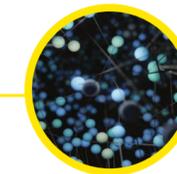

Reinforced sidewall for SUV robustness

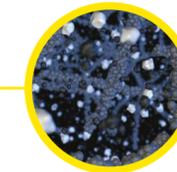

Directional tread pattern

Directional and symmetric pattern for optimized road grip and traction in wet and snow conditions, with a central groove for increased resistance to aquaplaning and improved braking control.

Latest generation tread compound

Innovative formulation integrating a new functional polymer to push wet and snow grip performance to the next level.

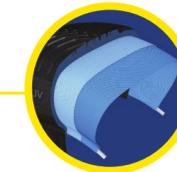

Under tread compound

For optimized rolling resistance that reduces fuel consumption and improves longevity.

Premium Touch sidewall design

A MICHELIN patent using nano technology laser engraving, creating a velvet-like micro texture.

Reinforced sidewall casing

Designed to meet the expectations of the SUV driver.
